

# WOODY BUTLER

## EXPERIENCE

**Teikametrics:** Software Engineer II January 2018 - Present

- Lead front-end developer for mission-critical project to rewrite entire sign-up, login and permission systems
- Architected and built new analytics page, relying on embedded Mode Analytics, which increased daily page traffic from 75 sessions to 225
- Curated Lunch & Learn series totaling over 70 hours of live presentation for engineering department technical education
- Ran reddit advertising campaigns which achieved cost-per-lead equivalent to traditional channels

**Curata:** Software Engineer July 2017 – November 2017

- Developed and architected event-consumer modeled data ingestion pipeline to production
- Optimized event processing speed by ~25x by removing repeated work and unnecessary data transfer

**Cogo Labs:** Software Engineer June 2016 – July 2017

- Architected Flask API integrating with Elasticsearch to tag SQL database content with Elasticsearch queries
- Wrote Python/PostgreSQL service to aggregate internal databases, exposing new analysis leading to \$10,000/month trivial revenue

**Paytronix:** Project Manager Fall 2015

- Managed team of 5 during class project for external client
- Project deliverables included 90-page formal report, blog post and presentation, converted into webinar

## EDUCATION

**Tufts University, Boston** Spring 2016

- B.S., Computer Science
- Minor, Entrepreneurial & Leadership
- PRISE Mentor
